## Seminar: Business Excellence with Innovative Improvements

The term “innovation” might mean different things to different people and thus different expectations when launching innovation in an organisation. The seminar will unveil the comprehensive framework of innovation for organisation, from cultural concern, to strategy and leadership, and finally the innovation management system; as well as the technical framework of systematic innovation and problem solving. This explains the phases of innovation and introduces a number of innovation tools, including Function analysis, Resources, Ideal final solution, Contradiction analysis and Evolution line of product design, etc. The speaker recognises that innovation scheme should be tailor made to suit different needs of organisations and depends on organisational objectives of introducing innovation and the special characteristics and readiness of personnel. Models of Samsung and Intel of introducing innovation will be discussed.
