HKSQ Book Order Form
Extenics: The Logic of Innovation
 創新之理則——介紹中國原創學科「可拓學」

HKSQ published a new book named “Extenics: The Logic of Innovation” in Dec 2019. It aims to introduce an original China New Science which studies the possibility of extending things, rules and methodology of developing innovation with formalized patterns for resolving contradictory problem. Extenics is also one of fundamental theories of AI in China. Prof. Cai Wen, father of Extenics, has created a basic theory and methodology to deal with incompatible problems since 1976. Then the birth of Extenics is from his first paper named “Extension Set and the Issue of Incompatibility” published in China’s Journal of Scientific Exploration in 1983. This book uses 31 short articles with diagrams to introduce the overall picture of Extenics theory.
