

Open Forum : AI and Fintech Applications for Banking, Finance and Servicing Industries

V322 The Hong Kong Polytechnic University

Date: 6th July, 2019 (Sat)

13:10 to 18:20

The new wave of technologies are artificial intelligence (AI) and fintech related. In the mean time the Hong Kong government has granted some 8 virtual bank licenses. All these have challenged the status quo of usual banking, finance and servicing industries. New business models adopting such technologies disrupt the value chain and our way of living. This open forum organized by the Department of Computing (COMP), The Hong Kong Polytechnic University, invites scholars and professionals to share their views on how AI and Fintech can be deployed to benefit Hong Kong and its international businesses.
